Vision™

No one understands Managed Print Services better than PrintFleet. Our award-winning Optimizer™ has been the platform of choice for leading MPS programs since 2006. Now PrintFleet Vision™ offers a fully managed and secure subscription-based service in a simple and affordable package.

Vision™ is a complete remote monitoring system, designed to capture, store, and analyze critical printing data from your client's locations. The enhanced system performance of PrintFleet Vision™ allows you to complete rapid device discovery and polling, with the ability to manage a virtually unlimited number of devices.

PrintFleet Vision™ reduces the complexity of managing imaging devices from multiple manufacturers that have to be monitored, maintained, serviced, and supplied with consumables.

PrintFleet Vision™ provides the flexibility to manage an entire print environment regardless of manufacturer, with a single tool for control and accountability. PrintFleet's relationship with manufacturers provides unparalleled device information and continuous growth of our extensive model database.

Features

Secure Hosting

- Access to full PrintFleet Vision™ functionality hosted in a secure and managed environment
- Easily scalable (no future hardware or bandwidth concerns)
- Automatically send customized reports to email recipients on a predetermined basis, or download in .PDF format, with a custom branded cover, directly from the web interface

Flexible Pricing

- No initial capital investment required
- Flexible low monthly per-device billing
- No long term commitment

Comprehensive Reporting

- Make better decisions by easily creating customized data reports
- Schedule reports to inform your customers where and when supplies are required

Alerts

Use PrintFleet Vision™ to your advantage to be proactive; increase device up-time, reduce inventory and improve your first call success rate.

- Develop proactive supplies and service programs
- Create status alerts based on event and occurrence thresholds, triggers, standard and vendor error codes, and even LCD screen text

PRINTFLEET®

1.866.382.8320 | printfleet.com

- The robust alert functionality allows you to identify potential issues before they become problems
- Generate a single alert to notify you at event start and event end, allowing for better management of the customer environment
- Be notified when selected alert conditions happen multiple times over a specified time period
- Use occurrence thresholds to help avoid sending your technician for trivial issues

Device Locations and Map

- Import an image of an office floor plan, and place the devices in their actual locations
- Use this as a consulting tool to reallocate, consolidate, replace, or retire devices, or to simply and quickly locate a particular device
- Receive a quick notification of device status with flashing indicators

Device Data Views

PrintFleet Vision™ offers several different views of device data, including:

Technical View – View basic device information including device name, supplies status, device status, yesterday's meter count, serial number, IP address, location, and last active date

Supplies Order View – Displays supply-related information, including toner levels or status, and order supplies

Alerts View – See the customer name, number of devices with recent alerts, and a link to view alert details for each device

Maps View – Upload images of your office floor plans, then use them to place images of printing devices, computing devices, people, and other miscellaneous items. PrintFleet automatically updates the status of the devices, allowing you to quickly identify and locate devices requiring attention

LINK™

LINK™ provides users a simple and elegant solution for automatic transmission of device and fleet data. The LINK™ platform was created to reduce costs and increase efficiency of supply chain relationships, benefiting resellers and their customers as well as distributors and suppliers of services to resellers. As a user of Vision™ you will have direct access to all of the LINK™ partnerships.

Let's have a conversation. Contact us today and let's provide a new "Vision" for your future.
