Vital Images® Showcases Powerful Enterprise Imaging Solution at RSNA 2017

Introducing enhancements to advanced visualization, image sharing, and prescriptive analytics solutions

November 22, 2017 – Minnetonka, Minnesota, USA – Vital Images will showcase enhancements to its powerful enterprise imaging solutions at the Radiological Society of North America (RSNA) annual meeting in Chicago, November 26 – December 1 in booth #7323. Built on an over 25-year pioneering legacy in the imaging industry, Vital continues to expand on three product lines that make up its Vitrea® Enterprise Imaging portfolio: Vitrea Vision, Vitrea Connection, and Vitrea Intelligence.

“We encourage RSNA visitors to work with our team of experts to build a simplified enterprise imaging strategy that can help to reduce costs, increase efficiencies, and improve clinical outcomes for your organization and patients,” says Vice President of Marketing, Mike LaChance.

This year at RSNA, Vital is highlighting key enhancements to their comprehensive enterprise imaging portfolio including advanced visualization, image sharing, and financial analytics solutions.

The newest version of Vitrea Advanced Visualization delivers a cohesive user interface across all modalities and all deployments. With its intuitive design and superior applications, Vitrea software facilitates improved clinical workflows across all departments. In addition, many new application specific enhancements have been added to the solution.

The Vitrea Connection line is showcasing an image sharing solution that automates the labor-intensive and error-prone manual processes of getting outside images, stored on physical media or within another PACS, VNA or image sharing system, into your primary clinical systems and workflows.

The Vitrea Intelligence line is featuring Opportunity Navigator, a prescriptive financial analytics solution that presents users with a menu of available financial “opportunities” and continuously directs users toward specific actions to increase revenues or avoid costs. With Opportunity Navigator’s powerful recommendation engine, users will always have actionable information at their fingertips to achieve their financial objectives and organizational goals.

“Vital is driven to innovate because we know that people and data are always in motion,” explains President and CEO, Jim Litterer. “We believe that relevant data must be readily available for interpretation. We bring clarity and context to information so that clinicians stay connected to the evolving patient story.”

About Vital Images

Vital Images, Inc., a Canon Group company, is a leading provider of diagnostic imaging and enterprise informatics solutions to help healthcare organizations deliver exceptional care while optimizing resources across multi-facility organizations. The company's solutions are scalable to meet the unique needs of hospitals and imaging centers and are accessible throughout the enterprise anytime and anywhere.
