## Hi there, You're Invited!

Densitas® is hosting a special event with Dr. Eliot Siegel moderating a panel of leaders in breast cancer screening and mammography including Dr. Laurie Margolies, Dr. Georgia Spear, and Ms. Louise Miller.

The panelists will discuss the impact of COVID-19 on breast cancer screening, and how the use of artificial intelligence can mitigate the risk of radiologist burnout and support quality of care, especially in a time when mammography facilities are experiencing increased workload and depleted resources.

Due to COVID-19 and the virtual nature of RSNA this year, the panel discussion was pre-recorded to ensure that a wider audience would be able to participate.

**Limited space available. Don't miss your spot, register now!**

**Tune in November 29 - December 3  
6:01pm CT / 7:01pm ET**
